# About Me

Hi, I am Final Year computer science engineering student with a passion for programming and a desire to learn new technologies. I have a solid foundation in Python programming and am familiar with the basics of Java. I am currently exploring the world of Data Science and doing some projects in this area. Apart from this, I am also proficient in data structures and algorithms in C++. My expertise in full stack web development has allowed me to create a wide range of web applications. In terms of theoretical knowledge, I have a good understanding of important computer science concepts such as DBMS, operating systems, and computer networking. Overall, my technical skills, knowledge, and passion make me a valuable asset to any team, and I am excited to continue to grow and learn in the field of computer science.

# Education

I have done my 10th from lucknow with 75 %, 12th with 70 % and currently i am doing mu engineeringand i have got 8.0 CGPA till now.

# Certifications

- Python Advance Certification from Udemy. -Full Stack web dev from internsala. - Basics of cloud computing from coursera. - Data science masters from PW skills.
